Subject: Re: Chemours NPDES Permit

Sorry, I just assumed that it was a five year permit from the date of issuance meaning until February 2017. Sorry for any confusion.

Becky B. Allenbach, Acting Deputy Director
Water Protection Division
EPA Region 4

Becky,
Not sure where the Feb. 2017 date came from.
The permit was issued on Feb. 6, 2012 with an expiration date of Oct. 31, 2016.
DWR received a renewal application for the Chemours NPDES Permit (NC0003573) on May 3, 2016.
Since the renewal application was received 180 days prior to expiration the permit is automatically continued until a new permit is issued.
There is not an updated permit at this time; however, the assigned permit writer was hoping to start the application review and permit renewal this August.
That was before all the news broke on GenX. The permit writer is involved and attending meetings with Chemours and learning the processes, etc so she can expedite the renewal.
Having said that, we do not want to issue a permit until we are sure it is protective of the stream usage.
Julie

Julie – know you have the best information on this. As I understand staff currently have the permit in queue for review.

Thanks for sharing the details with Becky.

Becky – appreciate the discussions today. Know there is more information to come from HQ on the TSCA Consent Order.

Thank you for helping with that effort.

Subject: Chemours NPDES Permit

Hi Linda:

Our records show that Chemours' permit should be up for renewal in February 2017. We have a request from a reporter. Is there an updated permit?

Becky
